REPORT CARATTERISTICHE

Pratica W1D1 – Andrea Petrilli

Caratteristiche del computer

Sistema

Modello	HC Technology HCAR6000-MI2 (mini PC)
Sistema operativo	Microsoft Windows 11 Home (build 26300)

CPU

Modello	AMD Ryzen 7 8845HS
Core / thread	8 core, 16 thread
Frequenza	3,8 GHz di base, fino a 5,1 GHz in boost
Cache	L2 8 MB, L3 16 MB

RAM

Capacità	32 GB
Tipo	DDR5, dual channel
Velocità	2793 MHz reali, circa 5600 MT/s effettivi
Timing	CL46

Hard disk

Modello	Kingston OM8PGP4512N-A0
Tipo e interfaccia	SSD NVMe
Capacità	512 GB (512.110.190.592 byte)

Esercizio facoltativo: benchmark

Il benchmark è stato eseguito con Novabench il 3 novembre 2026; il report completo è allegato in appendice.

Punteggio complessivo

Novabench Score	3014
Confronto	Mediana dei sistemi dal 2024: 2084. Mediana di tutti i sistemi: 1335
Percentili	68° dal 2024, 84° di sempre, 37° tra i sistemi con stessa CPU e GPU

Risultati per componente

CPU	Punteggio 2014 (mediana di sistemi simili: 2010), nella norma
GPU (AMD Radeon 780M)	Punteggio 384 (mediana di sistemi simili: 366), nella norma
RAM	Punteggio 407. Trasferimento 26816 MB/s, latenza 49 ns
Disco	Punteggio 209. Lettura sequenziale 3239 MB/s, nella norma. Scrittura sequenziale 110 MB/s, sotto la norma. Stato buono, vita residua 98%

Osservazioni

Novabench etichetta il disco come HDD, ma Windows lo riconosce come SSD NVMe, tipo coerente con i 3239 MB/s misurati in lettura. Nel report, utilizzando il comando da PowerShell Get-PhysicalDisk, è quindi indicato come SSD. Novabench classifica inoltre il computer come laptop, probabilmente perché monta un processore della serie per portatili (AMD Ryzen 7 8845HS), ma si tratta di un mini PC.

Il sistema supera nettamente la mediana dei computer dal 2024, mentre si colloca nella fascia medio-bassa tra quelli con la stessa CPU e GPU. CPU e GPU sono nella norma.
